Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-12, drawn to control system and a lift vehicle, classified in class 182, subclass 2.11.
- II. Claims 13-23, drawn to a method of controlling an envelop of a platform, classified in class 182, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a process not having a selector switch on the platform.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
